

# Tsunami QuickBridge 20 Wireless Outdoor Bridge

### **Data Connectivity Made Simple**

Proxim's Tsunami QuickBridge 20 is a complete, user-installable wireless point-to-point bridging solution designed for reliable building-to-building data connectivity. With 18 Mbps aggregate throughput, this hop-in-a-box is a high-performance, cost-effective alternative to leased lines and indoor Wi-Fi bridges. Eliminating the deployment challenges and recurring fees associated with standard T1 and E1 installations, the Tsunami QuickBridge 20 pays for itself in less than one year.

- Nearly three times the throughput of 802.11b bridges and more than seven times the speed of a T1/E1 leased line
- Voice over IP support enables low-cost voice transmission
- Web-based QuickBridge Manager allows flexible management of local and remote radios

### **Designed for Complete Ease of Use**

**APPLICATIONS** 

Redundant links

Dedicated ISP

subscribers

distances

between locations

from remote POPs

connections for large

Connectivity for long

wired networks

• High-performance

802.11b bridges

alternative to indoor

• Affordable alternative to

Voice and data backhaul

extension

Enterprise LAN and PBX

Tsunami QuickBridge is the easiest-to-install family of broadband wireless bridges on the market. Requiring no training or wireless experience, they can be set up and installed within hours. Each solution includes everything you need to set up a link right out of the box.

- Hop-in-a-box solution includes two radios with integrated antennas, cables, mounting hardware, power supply and documentation
- Easy to use software enables fast configuration
- Audible tones ensure antennas are properly aligned

### **Cost-effective Connectivity**

The Tsunami QuickBridge family offers the best priceperformance for campus networking and backhaul applications. Supporting voice and data transmission, they can easily replace T1/E1 or DS-3 connections with a payback of less than one year.

- Capacity from 6 to 54 Mbps supports enterprise and service provider bandwidth-intensive applications
- Connectivity for buildings located up to 6 miles away
- Synchronous voice channels available for low cost PBX extensions

### Flexibly Manage Your Entire QuickBridge Network

Designed for outdoor networks, Tsunami QuickBridge management tools enable network managers to view and proactively maintain all radios located throughout multiple facilities. In contrast to leasing lines, network ownership gives managers complete visibility into local and remote bridges.

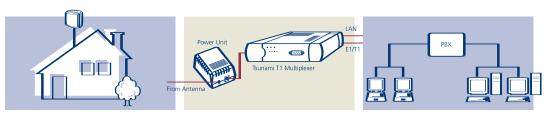

- Built-in SNMP support and web-based QuickBridge Manager simplify remote management and integrate easily into existing network policies
- Proactive alarm notifications enable network managers to maximize network performance

### Secure & Reliable

A wireless alternative to a wired network provides greater control over network quality. Backed by more than 20 years of wireless design innovation, Proxim's Tsunami QuickBridge solutions offer the highest security and reliability available in networking today.

- Up to 99.995% RF link availability
- Meets or exceeds wired network security
- Proprietary encryption methods ensure secure data transmission

## **Installation As Easy As 1-2-3**

1 Mount Quickbridge onto outside of each building

2 Using supplied CAT-5 cable, connect Quickbridge unit to indoor power unit, then to Tsunami T1 Multiplexer and power up units

Connect directly to exisiting LAN and PBX

# Tsunami QuickBridge 20 Specifications

# Proxim Corporation is a global leader in wireless networking equipment for Wi-Fi and broadband wireless networks. The company provides its enterprise and service provider customers with wireless solutions for the mobile enterprise, public hot spots, security and surveillance, last mile access, metropolitan area networks and voice and data backhaul.
